

Direction for outreach to our local leaders in response to the Cal poly

1. Continue to protect the Basins groundwater at healthy levels.
 - a. Water neutrality established in 2015.
 - b. Annual Report hydrographs show most areas are stable since 2015.
 - c. Those areas that are following are on the thin outer edges of the Basin
 - d. Or are shallower wells in the Geneseo and Branch Rd. rural residential subdivisions..
2. Preserve supplemental source options for Naci, Purple Pipe, State or other sources by specifically designating the Paso Basin as a high priority recipient.
3. Research and apply creative solutions including short and long term fallowing and water trading to utilize economics to leverage efficiency
4. Encourage GSAs to carry out sound policies to accomplish goals not merely meet minimum state standards
5. Consider overall economic impacts and benefits with ag uses of water.
6. Outreach program to gain positive participation in BMPs.
